HAREBNB WHITE PAPER

1. Executive Summary

HAREBNB is a meme-token built on the BNB Chain, combining fun and transparency with strong tokenomics and community trust. It's engineered to fight back against scams, pump-and-dumps, and low-effort meme projects by providing solid structure, locked liquidity, and real incentives for holders.

The project's mascot, Hare BNB, is the face of that vision—a southern, crypto-gambling ex-gangster turned Robin Hood.
He's either playing Texas Hold 'em or chasing dips while scrolling!

This isn't just a meme — it's a movement.

2. Who Is Hare BNB?

Hare BNB isn't your average crypto mascot.
He's a gritty, cigar-smoking ex-gangster from the Deep South — street-smart, tough, and loyal to a fault. Once knee-deep in the underworld, he walked away from crime, but not from risk. Now he channels that same energy into crypto, gambling, and giving back.

He's either playing Texas Hold 'em... or chasing dips while scrolling.

The Robin Hood of the Blockchain

Hare BNB doesn't just play to win — he plays for the people.
He's built different. Built to redistribute. Built to reward the holders who ride with him — not just early whales and pumpers.

With Hare BNB, every move reflects that code:
- 2–3% reflections from every transaction — straight to holders
- Periodic USDT & BNB giveaways — for real ones, not just big wallets
- 5% affiliate rewards — refer and earn with zero barriers
- NFT-based governance — real holders help make the calls
- Staking pools & lottery token — for those holding strong post-launch

He's not just a mascot — he's a mission.
A symbol that bad decisions don't define your future — and crypto should reward the community, not just the top.

3. Tokenomics

Total Supply: 374,000,000 HARE
Decimals: 6
Max Transaction: 1% (3,740,000 tokens)
Max Wallet Hold: 2% (7,480,000 tokens)

Transaction Fees:
Buy: 2% – Reflected to holders
Sell: 3% – Reflected to holders
Liquidity: 2% (buy/sell) – Sent to LP
Dev Fee: 2% buy / 3% sell – Funds team, marketing, giveaways, project growth

Note: Dev Fees are NOT locked. They support team operations, promotions, and growth. Only the Dev/Admin Wallet is locked and will be locked for 9 months. Everything will be done in plain sight to avoid confusion or assumptions

4. Allocation Breakdown

Pre-Sale / Reserve: 48%

Liquidity: 30%

Community: 12%

Dev/ Mod Wallet (Locked):5%

Marketing: 5%

*DXMint fee paid to DX.app for token creation.
*Dev Wallet will be unlocked in phases.
*Liquidity tokens are planned to be burned/locked indefinitely.
*All burns, locks, and transfers will be handled transparently and posted on our website and social media platforms.

5. Pre-Sale Details

Platform: T.B.A. Presale Start Date: September 8, 2025 Presale Price: $0.0006-0.0010

Key Features:
– 100% Public Sale – No whitelist
– Affiliate Program: 5% reward on successful referrals – Limited-edition NFTs and for top buyers
– Automatic refund if soft cap is not reached

Tokens bought during presale will be vested. 50% released upon completion of presale and the remaining 50% 2 weeks later. SO YOU WILL RECEIVE 100% OF TOKENS BOUGHT TWO WEEKS AFTER END OF PRESALE

6. Community & NFT Integration

7. Liquidity and Security

2% of each transaction goes into liquidity
90% of presale funds locked into liquidity
30% of post-launch revenue supports liquidity

1%Burned every transaction

Liquidity tokens may be burned after lock, reinforcing trust All changes posted publicly

8. Utility & Roadmap

Confirmed Utilities:
– Staking Pools (if presale & launch succeed)
– Affiliate Reward System (5%)
– NFT Governance Rights
– Periodic BNB Giveaways
Future Roadmap: –
– Cross-chain expansion (e.g., BASE, XRPL).
Collaboration/Partnerships on new projects
– DAO-style governance rollout after NFT launch

9. Ownership & Governance

Ownership retained at launch for:
– Manual burns
– Emergency fixes
– NFT-based governance rollout

Ownership may be renounced after project stability is confirmed and if doing so will help further grow the project. Trust being earned is a main goal here; the more you allow the more we will prove !

10. Team Values

– Full transparency – token movements posted
– Locked liquidity & phased Dev/ Mod Wallet unlocks
– No rugs –ONLY honest growth
– Commitment to community trust and fairness
– Responsible entertainment and fun trading in the meme space

11. Our Vision

HAREBNB was built for the underdogs, by the underdogs.
And it is a movement towards fairer tokenomics, real world uses, and transparent governance.
We believe in working for the people and while some claim to make a stand for honesty and openness we will create a new standard to hold others to!

We're here to build smart, fair, and entertaining crypto. Not just a meme — a message. What sets us apart from the others is we're putting our all into it to see others win ! HAREBNBs not designed to fill the dev teams pockets, it's made to start a new wave where devs deliver on promises and try their best to remain transparent and honest. If we can form a line of trust between holders and devs in this project then we completed one of our core missions ! It's about finding that healthy balance where everything can thrive and to work towards it daily, recording what we learn then apply if on the next step!
